Lok Adalat is an inexpensive mechanism for resolving disputes, without resorting to the procedural rigours of the courts. The Lok Adalat merely acts as a platform which facilitates the parties to arrive at a mutual agreement. It saves time, money, labour and most of all, it results in a win-win situation for both the parties, with no excess baggage of animosity and ill-will. Thus, it brings finality to a dispute, and the decision (award) of a Lok Adalat cannot be appealed in a court of law.
